PROFILE

As a Full Stack Web Developer with a focus on PHP, I have a proven track record of success in website management and development spanning more than 7 years. My expertise lies in creating highly engaging and interactive websites, leveraging my proficiency in WordPress, Laravel, Vue.js, React, and Angular. With a keen eye for detail and a results-driven approach, I have a deep understanding of SEO and PPC campaign creation, enabling me to create websites that not only look great but also perform exceptionally well. My skills in design, plug-ins, and implementation enable me to create custom websites tailored to meet the specific needs of clients. As a team player, I excel in collaborative projects and have strong leadership skills, ensuring that projects are completed on time and within budget. My extensive knowledge of various programming languages enables me to troubleshoot and solve complex coding challenges with ease.

WORK EXPERIENCE

APOGEEINVENT

Mar 2019 - Present

FULL STACK PHP DEVELOPER

- Developed and designed fast and responsive web applications for client-based product showcasing services.
- Created Restful services and APIs and integrated code for the developed applications.
- Reviewed code, debugged problems, and corrected issues for vanilla PHP backend and different frontend platforms such as WordPress, Angular JS, VUE JS, and Shopify
- Developed custom WordPress plugins and APIs using PHP, JavaScript, and CSS
- Managed back-end services and data interchange between server and user, including server-side logic and database integration.
- Consulted with engineering team members to determine system loads and develop improvement plans.
- Coordinated weekly team meetings with all WordPress engineers, and maintained GIT repositories and Pantheon environments.
- Translated designs and concepts into highly usable and engaging web applications using a variety of technologies.
- Developed an e-commerce module with different payment gateways and custom modules as per clients' requests.
- Wrote comprehensive manuals, guides, and documents and collaborated with developers, designers, sysadmins, and customers.
- Delivered performance-driven and user-centric websites that met all business requirements

FORKLIFT TRAINING

Feb 2018 - Feb 2019

WORDPRESS DEVELOPER

- Designed complex WordPress solutions for back-end and front-end development, establishing and guiding website architecture and functionality.
- Developed functional and fast-responsive web applications using React.js, MVC frameworks like Angular, PHP, and Rest services.
- Enhanced user experience by designing new web features and constructing a personalized interface based on user preferences and activity.
- Created custom multistep forms with programmatic calculations based on user login and field values.
- Customized an already-built plugin as per client requirements and synced up two websites using WP-JSON and REST API.
- Optimized the website for Google Page speed and YSlow, and developed a new base WordPress theme for building new websites.
- Worked with Elementor, Avada, and Divi to develop websites, and customized themes to meet clients' requirements.
