WORK EXPERIENCE

APOGEE INVENT
FULL STACK PHP DEVELOPER   Mar 2019 - Apr 2022

It's a client-based product showcasing service. Develop functional and fast -responsive web applications. Developing and designing Restful services and APIs. Integration of code, Unit Testing and Deployment of Developed applications. Write comprehensive manuals, guides, and documents. Collaborate with developers, designers, sysadmins, and customers.

- The backend is in vanilla PHP and for the frontend different platforms like WordPress, Angular JS VUE JS and Shopify.
- Reviewed code, debugged problems and corrected issues.
- I developed the e-commerce module with different payment gateways with additional day to day

tasks and client specific sites. So the idea is to have a product with minimal features which then on client's request, custom modules would be added in as per the requirements.

- Consulted with engineering team members to determine system loads and develop improvement plans.
- Delivered performance-driven and user-centric websites that met all business requirements.
- Developed custom WordPress plugins And Developed API's using PHP, JavaScript and CSS.
- Manage back-end services and interchange of data between server and user, including server-side logic and database integration.
- Coordinated weekly team meeting with all WordPress engineers. Maintain GIT repositories and Pantheon environments.
- Responsible for translating designs and concepts into highly usable and engaging web applications using a variety of technologies
